Natl. Acad. Sci. U.S.A. 85:1359-1363 (1988).

-!- FUNCTION: Plays a critical role in MHC class II antigen processing by stabilizing peptide-free class II alpha/beta heterodimers in a complex soon after their synthesis and directing transport of the complex from the endoplasmic reticulum to compartments where peptide loading of class II takes place.
-!- SUBUNIT: Nonamer composed of three alpha/beta/gamma heterotrimers

Identification of a new class of transport protein."; J. B.D. Chem. 268:14071-14080(1993).

-!-FUNCTION: Has both ATPase and helicase activities. Unwinds DNA duplexes with 3 to 5' polarity with respect to the bound strand and initiates unwinding most effectively when a single-stranded region is present. Involved in the post-incision events of region is present. Involved in the post-incision events of region is planty: Belongs to the helicase family. UvrD subfamily.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
